

Here's how easy it is to use the new Text-to-Sign functionality:

When you reach the Client e-Signature page you will have **two options**.

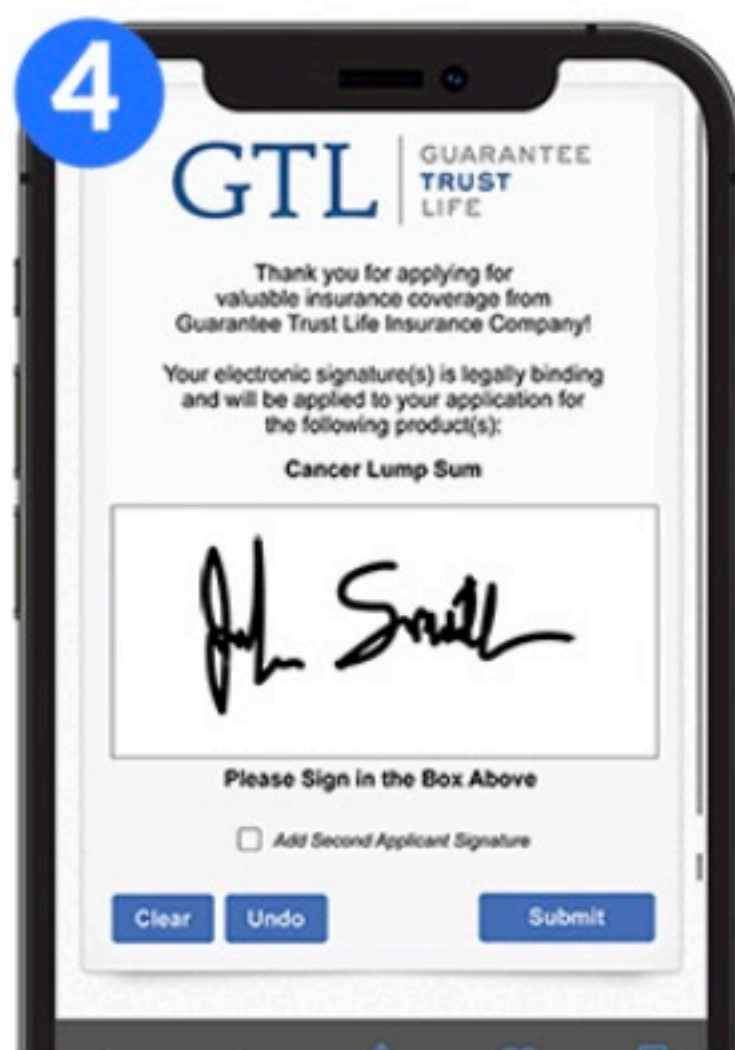

Select **Text-to-Sign** and enter your client's cell phone number and click the Send Link button.

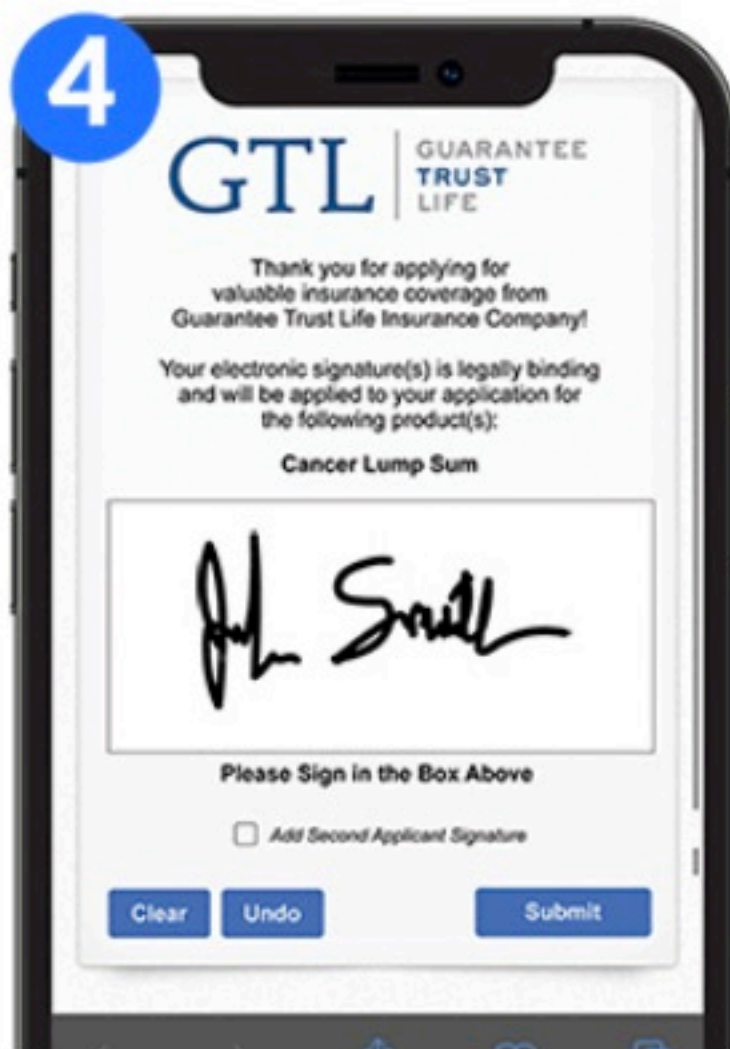

Your client will receive a **text message with a secure link** to sign their application.

Please note: Because Text-to-Sign was built to work in real-time, the link will be valid for 30 minutes and must be completed to continue the application.

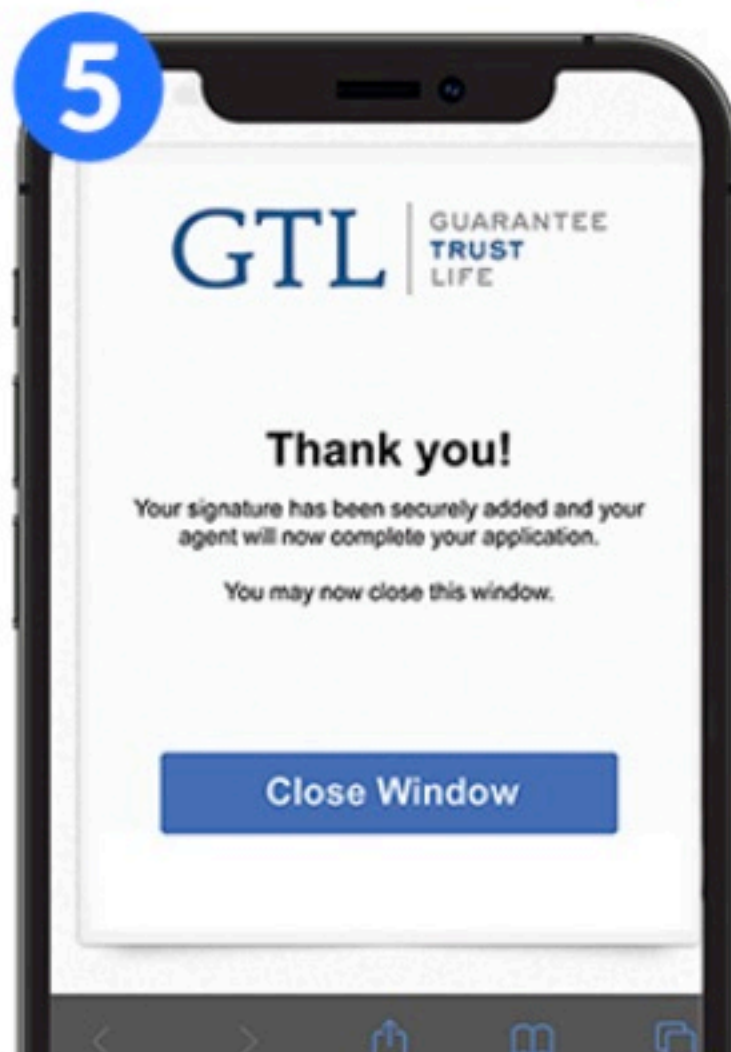

Your client will **sign inside the window*** and then tap **Submit**. A second signature can be added by checking the bottom box.

***Please make sure your client writes their signature as legibly as possible. Dots and lines will not be accepted.**

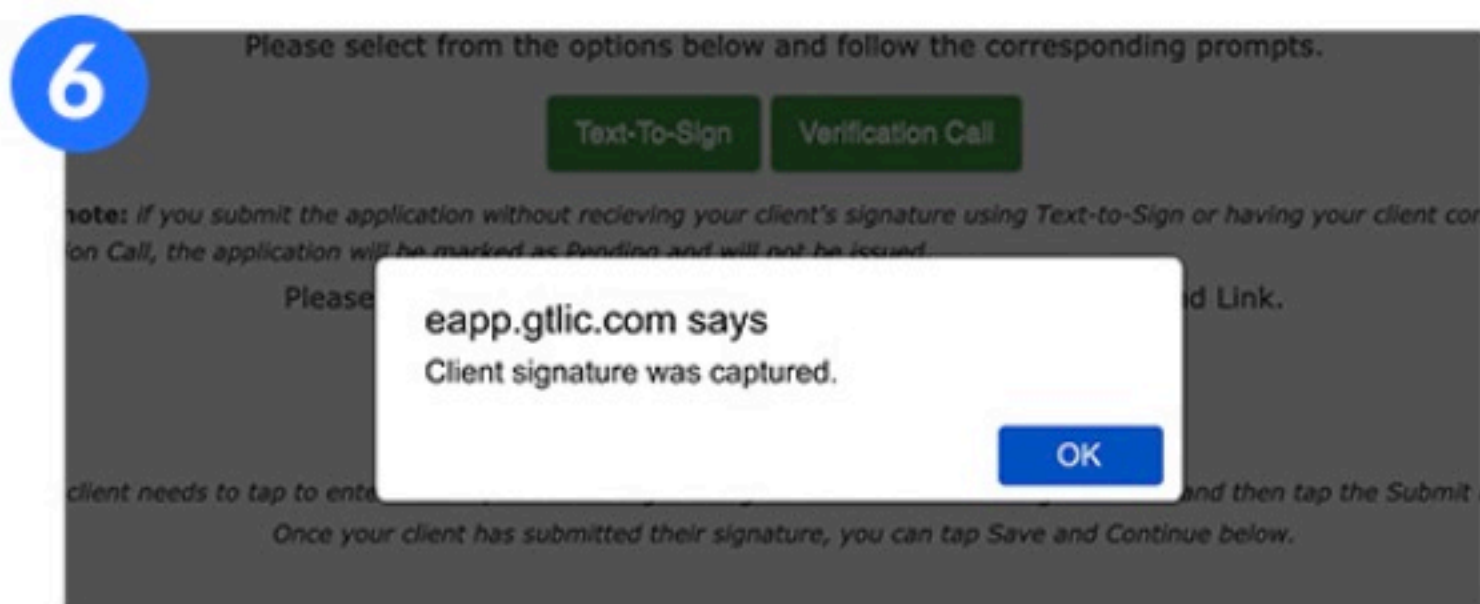

Your client will **sign inside the window*** and then tap **Submit**. A second signature can be added by checking the bottom box.

***Please make sure your client writes their signature as legibly as possible. Dots and lines will not be accepted.**
To get a larger area to sign, please hold the phone horizontally.

Your client will receive a **thank you message** and can now close the window.

You will receive a message on the Agent Portal that the **signature was captured**. You can now continue with completing the application.

*If you have any questions please contact Sales Support by texting or calling **1-800-323-6907** or by emailing agency@gtlic.com.*

We thank you for your business!
